Withdrawn Rejections

Claim Rejections - 35 U.S.C. § 112

5. The rejection of claims 21, 22, 27 and 28 under 35 U.S.C. 112, first paragraph in relation to a specific and substantial asserted utility or a well established utility is withdrawn.

Claim Rejections - 35 U.S.C. § 101

6. The rejection of claims 21, 22, 27 and 28 under 35 U.S.C. 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility is withdrawn in view of Applicants' arguments.

Claim Rejections - 35 U.S.C. § 102

7. The rejection of claims 21 and 27 under 35 U.S.C. 102(e) as being anticipated by U.S. Patent #5,919,660 (filed June 24, 1997) is withdrawn in view of Applicants' amendment to claim 21.
8. The rejection of claim 21 under 35 U.S.C. 102(b) as being anticipated Accession #A55302 (July 8, 1995) or Gabig et al. (J. Biol. Chem. 269:29515-29519, 1994) is withdrawn in view of Applicants' amendment to the claim.

Art Unit: 1642

Claim Rejections - 35 U.S.C. § 103

9. The rejection of claims 21 and 27 under 35 U.S.C. 103(a) as being unpatentable over Accession # A55302 (July 8, 1995) or Gabig et al. (J. Biol. Chem. 269:29515-29519, 1994), in view of Harlow and Lane (Antibodies, A Laboratory Manual, Cold Spring Harbor Laboratory, 1988) is withdrawn in view of Applicants' amendment to claim 21.

New Grounds of Rejection

Claim Rejections - 35 U.S.C. § 112

10. Claims 21, 27, 28 and 43-45 are rejected under 35 U.S.C. 112, first paragraph, because the specification, does not reasonably provide enablement commensurate with the scope of the claimed invention. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Claim 21 is broadly drawn to a biologically-active fragment, as well as a immunogenic fragment of SEQ. ID. NO:3 or SEQ. ID. NO:5 comprising at least 30 contiguous amino acid residues. The scope of the claims is not commensurate with the enablement provided by the disclosure with regard to the number of proteins broadly encompassed by the claims and the claims broadly encompass a significant number of inoperative species. Since the amino acid sequence of a protein determines its structural and functional properties, knowledge of which sequences of the amino acids would retain similar biological activity and immunogenicity the same as Applicants' is required. The disclosure does not provide any information disclosing what

Art Unit: 1642

fragments of SEQ ID NO:3 or SEQ ID NO:5 should be regarded as biologically active or immunogenic. The specification exemplifies no examples of the effective use of the sequences consisting of SEQ ID NO:3 or SEQ ID NO:5, nor fragments of these polypeptides as a pharmacological agent and no such uses are art known. Therefore, due to the unpredictability of therapeutics and the absence of any evidence concerning the effectiveness of the claimed pharmaceutical composition as a pharmacological agent, the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected,

Applicants have not provided sufficient guidance to enable one of ordinary skill in the art for the intended use of the claimed proteins as a therapeutic agent. The scope of the claims must bear a reasonable correlation with the scope of enablement. In view of the lack of guidance, lack of examples, and lack of predictability associated with regard to using the myriad of contiguous amino acid residues encompassed in the scope of the claims, one skilled in the art would be forced into undue experimentation in order to practice the broadly claimed invention.

Maintained Rejections

Claim Rejections - 35 U.S.C. § 112

11. The rejection of claims 21, 22, 27, 28 and newly added claims 43-45 under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is maintained.

Art Unit: 1642

Applicants argue that "while identifying a polynucleotide sequence, and the polypeptide encoded by the polynucleotide sequence, was a major undertaking at one time...sequencing and sequence assembly have greatly simplified the process." While the Examiner concurs with this Applicants' have yet to identify what amino acid substitutions, deletions and insertions would be allowed that would yield variant with at least 90% amino acid sequence identity to SEQ Id NO:3 and SEQ ID NO:5. For these reasons, as well as for the rejection are of record in paper no.8, mailed June 20, 2000 the rejection is maintained.
